

Workplace Violence

- **Disorderly conduct** +49%
- **Simple assaults** +117%
- **Violent crime** +15%

Potential causes for increase: Behavioral health acuity, substance use, social instability, emotional distress

Violent crime stability may be due to threat management practices, behavioral response protocols, sustained facility investment in WPV prevention and mitigation

2012-2024 Crime rate trends (per 100 beds)

Source: IAHSF, 2025 Crime Survey

Workplace Violence

Type 2 WPV events:

Aggravated Assault

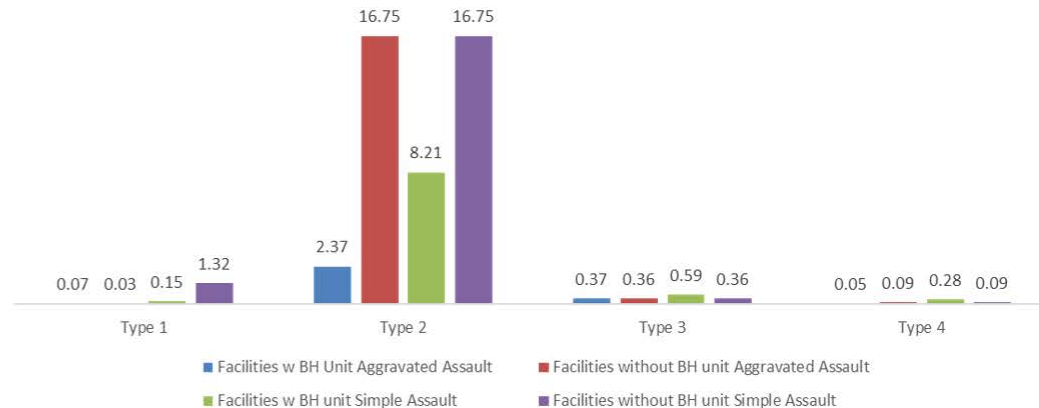

- Facilities with BH-unit 2.37
- Facilities without BH-unit 16.75

Simple Assault

- Facilities with BH-unit 8.21
- Facilities without BH-unit 16.75

Facilities without BH-units have **higher rates** than those with BH-unit. Potentially due to managing behaviorally complex patients in environments not designed for BH care.
